AutoCAD 1.0 was not released with the "AutoCAD" name on the cover of the box or on the box itself. It was initially distributed as a standalone program or as a ROM-based version. It was a simple drafting program, not a full-featured CAD program. AutoCAD 2.0 was not originally released with the "AutoCAD" name on the cover of the box or on the box itself. AutoCAD 2.0 was a full-featured CAD system that was introduced in December 1983, with a user interface that consisted of a single text-based window. AutoCAD 2.0 was later renamed to AutoCAD 2000. Product line AutoCAD is available for PCs running Windows, macOS, and Linux, as well as iOS, Android, Windows Phone, Windows RT, Xbox, and PlayStation. In addition, AutoCAD LT is available for a smaller number of operating systems and device types, and AutoCAD Web and mobile apps are available for web browsers and mobile phones. Usage Most often used by designers, architects, and engineers, AutoCAD is available for desktop computers and as a cloud-based application. AutoCAD can also be installed on tablets or used on a mobile device. For example, many universities have their own mobile applications that integrate with AutoCAD. The company has made efforts to make AutoCAD usable by those without a technical background, such as in the introduction of the "Draw" command, which allows non-technical users to create basic drawings. For example, AutoCAD 2003 had a "Draw" command called "AutoCAD Graphic" that allowed users to generate basic 2D or 3D images. Although AutoCAD

In 1988, 3D Systems acquired most of the assets of 3D Computer Corporation. 3D Systems created an internal company named PTC to develop AutoCAD. In 1989, 3D Systems was acquired by Autodesk, Inc. AutoCAD has been under Autodesk's ownership and development since then. In May 2016, Autodesk announced that it was acquiring Merant, a firm that had also been in the CAD business for more than 40 years, which was headed by Paul G. Stengel. The merger and acquisition of Merant by Autodesk was completed on June 29, 2016. On September 29, 2017, Autodesk acquired the subscription-based online CAD-software company, RapidForm. On July 24, 2018, Autodesk announced that the company had acquired Partiview, a Dutch based subscription-based cloud provider for architecture and engineering professionals. The new partnership enables engineering and construction professionals to quickly and easily publish, manage and collaborate on complex technical and engineering drawings, as well as workflows and integrated projects in a fully integrated cloud platform from Autodesk and Partiview.
