SharePoint integration In 2013, AutoCAD was extended to include support for file sharing and data services via a REST interface, according to the Windows SharePoint Services 2010 platform. This allows creating files to be placed on a shared drive, and can be accessed by computers running Microsoft Office or AutoCAD. The capabilities are similar to those available from using Microsoft Office's File Downloader or Document Conversion Tools. AutoCAD Architecture In 2015, AutoCAD Architecture was introduced. It is a 3D architectural design program with a large number of 2D and 3D building design and construction features. It is part of the Autodesk Architectural Desktop software suite and is used for the creation of architectural design documents. Some of the features include: Production of project-ready BIM (Building Information Modeling) models for 3D printing or construction Generation of photo-realistic models for construction and visualization Production of 2D drawings for a variety of purposes: 2D AutoCAD Drawing and AutoCAD Architecture Geometry creation and editing Geometry modeling and conversion Document and printing Permissions and authentication Document searching Asset management References External links Category:Computer-aided design software for Windows Category:Dynamically linked libraries Category:Electronic publishing Category:Microsoft Office-related software Category:Technical communication tools Category:Technical communication tools in the field of computer visionThe present invention relates to a prosthetic replacement for an incisor, canine, or molar tooth, and, more particularly, to a new and improved orthodontic appliance that is directly attached to a tooth without using an intermediate adhering matrix, such as a cement. Orthodontic treatment involves movement of malpositioned teeth to desired positions in the oral cavity. Typically, appliances such as braces are applied to the patient's teeth by an orthodontist or dentist. The braces exert continual forces on the teeth and gradually urge the teeth to various positions. Over a period of time, the orthodontist adjusts the braces to move the teeth toward desired positions. The process of adjustment may be tedious and time consuming. In some instances, the patient may have a tooth that has abscessed or that is infected, decayed, cracked, or the like. In such instances, the tooth may need to be extracted, and a prosthetic replacement is needed. Prosthetic replacement teeth are typically placed in a a1d647c40b

KILGORE, Defendant-Appellant. No. 89-8024. United States Court of Appeals,Eleventh Circuit. Aug. 27, 1990. G. Clay Mitchell, Macon, Ga., for defendant-appellant. R. Eugene Nielson, Atlanta, Ga., for plaintiff-appellee. Appeal from the United States District Court for the Northern District of Georgia. Before ANDERSON and BIRCH, Circuit Judges, and LIVELY*, Senior Circuit Judge. BIRCH, Circuit Judge: 1 James L. Kilgore, the appellant, appeals from an order of the district court affirming a final order of the bankruptcy court denying his motion to reconsider the bankruptcy court's ruling that his divorce-decree obligations are nondischargeable. On appeal, Kilgore argues that the bankruptcy court erred in determining that a state court's dismissal of a divorce action on the merits constituted a "determination" of the dischargeability issue for purposes of 11 U.S.C. Sec. 523(a)(5), and that the bankruptcy court lacked jurisdiction to reopen the case because it was closed after Kilgore filed his petition for bankruptcy. Finding that Kilgore's second argument is without merit, we conclude that the bankruptcy court did not err in holding that it had jurisdiction to reopen the case. We conclude that the bankruptcy court did err, however, in holding that the state court's dismissal of the divorce action was a "determination" of the dischargeability issue under Sec. 523(a
