Leveraging the wealth of imaging technology that is built into the GPU, Nvidia's graphics cards have the ability to render high quality 3D graphics much faster than the CPU could before. Nvidia graphics chip GPU rendering performance has become very high-end, but the demand is still outstripping the ability of the typical PC to deliver it. As a result, the technology is now becoming available in the consumer desktop market. Nvidia claims that PC gamers can see up to 20% performance boosts in graphics applications running on the RTX 2080 Ti compared with the GeForce GTX 1080 and RTX 2070.
