This book provides comprehensive. The NX-OS Platform is a modular and scalable datacenter architecture,. How to download NX-OS and Cisco Nexus Switching: Next Generation.U.S. Patent Publication No. 2002/0031439 by Kirzner et al. and entitled System, Method, and Computer Program Product for Sharing a Session, published Dec. 12, 2002, describes a system and method for transferring a session from one host to another. According to Kirzner, "a session is a period of activity during which a request is processed by a server and a response is returned by the server to a client system. A 'host' in this context refers to a system, which provides the server, and a 'client' refers to a system which needs to process the request. Sessions are generally time-limited; that is, they have a specified duration from the beginning of the session to the point at which the session is closed by the server. Session management systems exist to store and distribute the results of sessions. "The invention relates to a method for sharing a session between different hosts. Each host can have its own session manager, which is capable of mapping session information between each host and the session manager so that the session can be shared. The session manager operates according to this method, and is a part of the session management system. A typical session management system includes a session manager and one or more servers that perform the requested server functions. "The method for sharing a session in accordance with the present invention allows a host to share a session with one or more other hosts. The session is transferred to the other hosts, who can execute the session. It allows the other hosts to execute session commands, which are issued by the host that created the session." Another U.S. Pat. No. 5,983,138 by Kirzner et al., and entitled DATABASE ENHANCEMENT FOR SHARED SERVER, describes a system and method for sharing server databases between different hosts. Another U.S. Pat. No. 5,499,302 by Kirzner et al., and entitled BASIC LAUNCH SYSTEM FOR SHARED SERVER and U.S. Pat. No. 5,905,525 by Kirzner et al., and entitled SYSTEM AND METHOD FOR PREFERENCE BASED DATA PASS THROUGH, describe a system and method for sharing server databases between different hosts. These patents are
