zuma has come to fill a niche in the entertainment market. originally designed to be a game for children, zuma has ended up appealing to all ages. the game has not been without its critics however. many of the game's critics have pointed out that the game is actually quite addictive, which in theory, should be a good thing for a game designed to help children develop good behaviors. while many of the critics of zuma have pointed out that the game is potentially addictive, there are also a number of skeptics who point out that some of the most addictive games are the ones that are also social media-based. you know the ones that will give you a boost of self-esteem if you post a picture or video of yourself playing the game? the long arms of the law have been thrown out again, and again and again, and the number of bands filed with the bureau of copyrights against the zuma-clans has risen, too. only in france does there seem to be more police officers tasked with protecting copyright law than there are artists who are able to support themselves through it. since the law made it illegal to make unauthorized copies of a work, it has resulted in a whole industry of people selling unlicensed software, which is really just piracy. many people prefer to pay for the products they use rather than risk being caught in the crosshairs of a bureaucrat with a badge and a pair of handcuffs. the four pillars of the swedish copyright law are: the right to be paid, the right to the result of the labour, the right to use and the right to spread and make available. the act of copying something that is given to you by someone else is theft, no matter how much you paid for it. in reality, there is no legal or illegal source of a song. it is whatever the producer wanted it to be when he produced it. he may have set it to be played only on the radio, but then it is in fact a possible hit for a singer, and it is a song that can be heard on the radio. to a more extensive and more detailed view, i recommend the us copyright office. also the copyright center from the library of congress is a good place to start. 5ec8ef588b
